Aller dans le menu : Management > Firmware Upgrade

The screenshot shows the Mediatrix web interface. At the top, there is a navigation bar with the Mediatrix logo and a menu with items: System, Network, POTS, SIP, Media, Telephony, Call Router, Management (selected), and Reboot. Below this is a sub-menu with items: Configuration Scripts, Backup / Restore, Firmware Upgrade (selected), Certificates, SNMP, CWMP, Access Control, and Misc.

A warning message is displayed: "Warning: Firmware Updater installation in progress, the unit may initiate an automatic restart. The Firmware Pack Updater status may have changed while the current page was loading, please click this link to get the latest FPU status."

The main heading is "Firmware Upgrade". Below it, a message states: "Successfully **launched** the Firmware Pack installation."

The "Status" section contains the following information:

Firmware Pack Updater Status:	Updating <input type="checkbox"/>
Last Installation Result:	Success
Last Successful Installation:	1999-12-31 19:00:10

The "Firmware Packs Installed" section contains the following table:

Name	Version	Profile	Bank	
Dgw	43.2.1343	4102-MX-D2000-302	Main - In Use	<input type="button" value="Factory Reset"/>

The "Firmware Packs Configuration" section contains the following information:

<b>Single File</b>	
Mfp Url:	<input type="text" value="tftp://192.168.0.11/Mediatrix4102_Dgw_49.2.2"/>

Dans le sous menu Firmware Packs Configuration, entrer l'url du chemin tftp :  
tftp://@IP/nom\_du\_fichier.bin

Puis cliquer sur appliquer. Attendre le reboot automatique.
