

Mise à jour

Aller dans le menu : Management > Firmware Upgrade

The screenshot shows the Mediatrix web interface. At the top, there is a navigation menu with tabs for System, Network, POTS, SIP, Media, Telephony, Call Router, Management, and Reboot. Below this, there is a sub-menu with tabs for Configuration Scripts, Backup / Restore, Firmware Upgrade, Certificates, SNMP, CWMP, Access Control, and Misc. The Firmware Upgrade tab is selected. A warning message states: "Warning: Firmware Updater installation in progress, the unit may initiate an automatic restart. The Firmware Pack Updater status may have changed while the current page was loading, please click this link to get the latest FPU status." Below the warning, there is a section titled "Firmware Upgrade" with a sub-section "Successfully launched the Firmware Pack installation." This section contains three tables:

Status	
Firmware Pack Updater Status:	Updating <input type="checkbox"/>
Last Installation Result:	Success
Last Successful Installation:	1999-12-31 19:00:10

Firmware Packs Installed			
Name	Version	Profile	Bank
Dgw	43.2.1343	4102-MX-D2000-302	Main - In Use

Firmware Packs Configuration	
Single File	
Mfp Url:	<input type="text" value="tftp://192.168.0.11/Mediatrix4102_Dgw_49.2.2"/>

Dans le sous menu Firmware Packs Configuration, entrer l'url du chemin tftp :
tftp://@IP/nom_du_fichier.bin

Puis cliquer sur appliquer. Attendre le reboot automatique.
