

Configuration du multicast

Activation du multicast :

```
-> ip multicast status enable  
-> ip multicast querying enable  
-> ip multicast zapping enable  
-> ip multicast version 2  
-> ip multicast querier-forwarding enable
```

Puis activation dans un vlan :

```
-> ip multicast vlan 101 status enable  
-> ip multicast vlan 101 zapping enable  
-> ip multicast vlan 101 version 2  
-> ip multicast vlan 101 proxying enable  
-> ip multicast vlan 101 querier-forwarding enable
```

Vérification :

```
-> show ip multicast vlan 101
```
