

Configuration du STP

Configuration générale

```
-> bridge mode flat
```

puis choisir un protocole :

```
-> bridge protocol mstp  
-> bridge protocol rstp  
-> bridge protocol stp  
-> bridge protocol 1W  
-> bridge protocol 1D
```

1. MSTP : Création de plusieurs instances STP
2. RSTP : Convergence plus rapide que le STP
3. STP : Le classique

Configuration 1x1

```
-> bridge mode 1x1  
-> bridge 1x1 10 priority 4096
```
