

# Mettre à jour ESXi

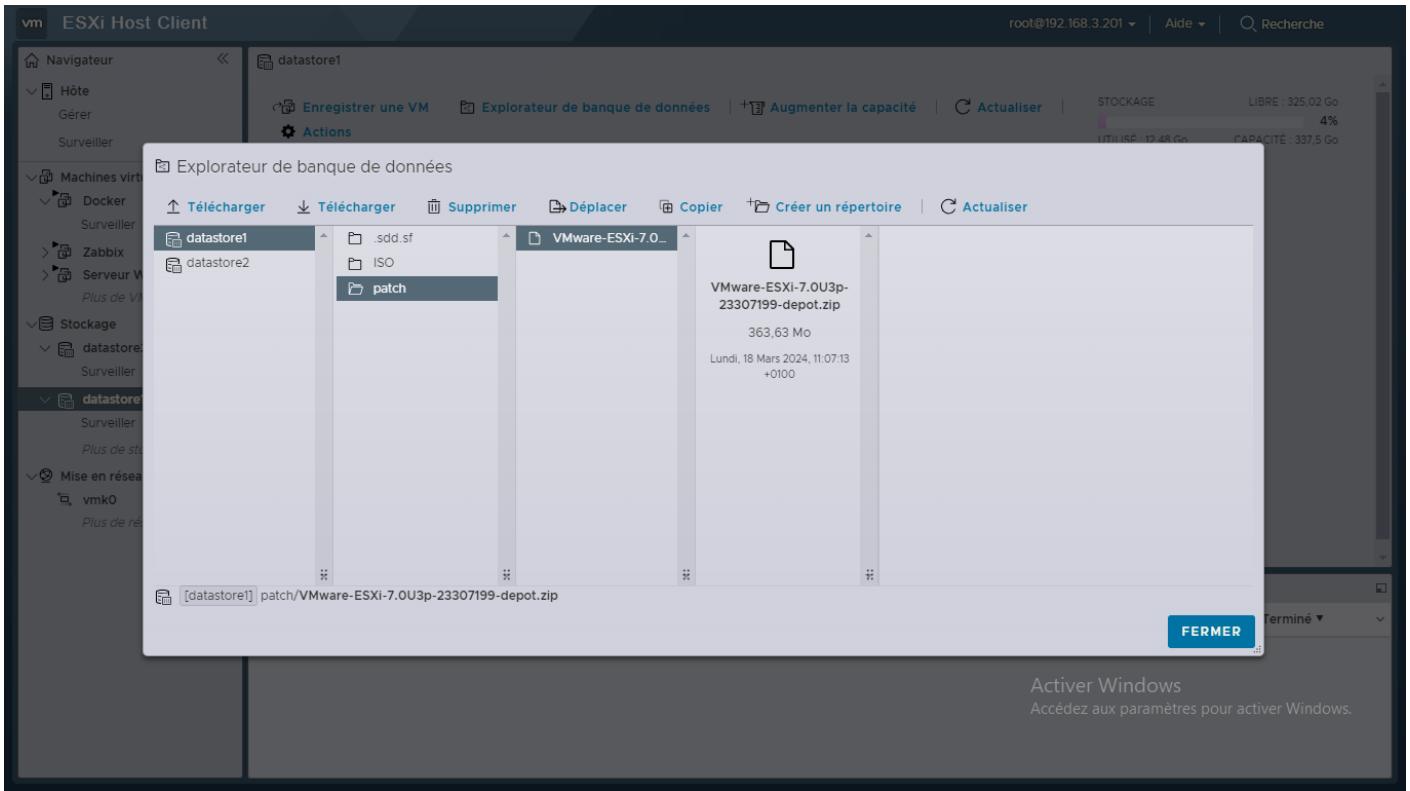

Etape 1 : Activer le SSH

Etape 2 : Passer ESXi en mode maintenance

Stopper les VMs

Etape 3 : Mettre le fichier zip dans un datastore

## Etape 4 : Connexion à ESXi en SSH

```
[root@localhost:~] esxcli software vib install -d /vmfs/volumes/datastore1/patch/VMware-ESXi-7.0U3p-23307199-depot.zip
```

indiquer le chemin où se trouve le fichier zip

Si tout se passe bien, on obtient :

```
[root@localhost:~] esxcli software vib install -d /vmfs/volumes/datastore1/patch/VMware-ESXi-7.0U3p-23307199-depot.zip
```

Installation Result

Message: The update completed successfully, but the system needs to be rebooted for the changes to be effective.

Reboot Required: true

## Etape 4 : Reboot

```
[root@localhost:~] reboot
```

## Etape 5 : Désactiver le mode maintenance
